TECHNICAL SKILLS

- **Language**: JavaScript and Dart
- **Back End**: Node.js, Express, SQL and PostgresSQL
- **Front End**: React, HTML, CSS, Flutter and UX
- **Testing**: Jest, Chai, Sinon, Mocha and Supertest.

WORK EXPERIENCE

o **Northcoders, Trainee Developer Sep '19 - Dec '19**

- Solid understanding of web development and web technologies such as JavaScript, chai, mocha and React.

-Up-to-date knowledge of technologies such as SQL.

-A good understanding of design patterns and frameworks such as MVC

-An understanding of Continuous Integration, Continuous Delivery and Kanban

-An understanding of major browsers (including dev tools) and platforms (Linux)

-Good knowledge of security principles and secure coding

-A proficient in writing good quality object-oriented code using that is simple, fast under load and robust

-An ability to work to deadlines

-A good eye for detail

Projects:

o **Northcoders News**

Full-stack Reddit' style news aggregation board. Articles can be voted on or discussed, with the user also able to vote on comments. Restful API built with Node.js, Express.js, PostgresSQL and frontend built with React.js and CSS. Testing carried out using TDD with Mocha, Chai and Supertest.

Frontend
- **Built with:** React and CSS
- **Github**: https://github.com/chancayl/FE-NC-News.git

Backend
- **Built with:** Node.js, Express, PostgresSQL, Chai, Mocha, Supertest and Heroku
- **Github**: https://github.com/chancayl/BE-NC-News.git

Hosting: https://chancayl-ncnews.netlify.com/

- o **Final project: Saviar, A clean route through impure air**

Two weeks project at Northcoders Bootcamp working in a team of five members. The application built is a running app that will create a running route for the user, avoiding the most heavily polluted local areas. We delivered an end-to-end application in an agile environment. Had daily standups and utilised kanban board.

Frontend
- **Build with:** React native, Mapbox, Xcode and Here
- **Github**: https://github.com/BHILT-RunningApp/Front-End-React-Native-XCode

Backend
- **Build with:** Node.js, Express, Mongoose, Chai and Supertest
- **Github**: https://github.com/BHILT-RunningApp/BE-RunningApp

Demo: https://www.youtube.com/watch?v=lE62AV5jQNc

- o **BookingGo, Operations & Product Support Executive April 2017 – Present**

Deliver a high level of customer service by:
- Building and maintaining a superb relationship with all our suppliers.
- Resolving supplier and customers queries within deadlines.
- Calling suppliers head office/locations for last-minute confirmations.

- o **Booking.com, Customer Service Representative Apr 2016 – Mar 2017**
- Helping each customer find their ideal car.
- Dealing with enquiries between booking and pick-up.
- Answering questions after the rental has finished.
